Sprint 4 Plan

Sprint Goal: We did not finish the user stories for sprint 3, and will be completing them this sprint. We will finish the backend for reset password. Users will get a link that will redirect them to a page that allows them to change their password and it will update the database. We will continue to work on the driver interface for viewing posts and accepting/declining rides. For the passenger posts, we will continue to work on the payment calculation and specify coverage area for drivers.
